

Alpha Search Advisory Partners has provided human capital solutions for the alternative asset management industry for over 25 years.

Our asset management recruiting experience spans more than a thousand placements of tenured staff, future leaders, and C-level executives. Extensive market intelligence within alternative asset management gives us a strategic advantage to efficiently identify, recruit and place top performers who quickly impact the bottom line. The result is a proprietary pool of the strongest candidates, the best fit, the longest tenure, and maximum performance.

FOCUSED. We have long-standing relationships with the most talented individual players and premier organizations in the industry. Our talent pool is drawn from across the globe. We service clients exclusively in alternative asset management strategies, such as private equity, real estate, hedge funds, fund of funds, liquid alts, CTAs, managed futures, real assets, and structured products.

INFORMED. We understand the competitive dynamics of the alternative investment industry. It's lean, sophisticated, and exceptionally nimble. We have worked with fund managers to address competitive needs quickly, with detailed, granular industry mapping and reverse engineering of the organizational structures of leading fund managers. We bring this intelligence to bear in every single search project.

EFFICIENT. We never start from scratch. Decades of building relationships with select, 'best-of-breed' professionals provide you with immediate access to the talent you want to meet. We connect you with candidates that are off the market and don't respond to cold calls or advertisements; the best candidates exactly for your needs, not just the best of what happens to be available. With data-rich candidate memorandums from our search consultants, your vetting process is more productive, targeted and efficient.
